The modern,Shuangye Electric Bike will appeal to all users who desire to travel independently, without contributing to air pollution. The electric bike has a 250-watt motor so that you can easily negotiate hills and curves, or you can use the pedals to burn a few extra calories on the straightaway. Features of the electric bike include an aluminum frame, a 21-gear shifting mechanism that's easy to operate, and brakes on both front and rear wheels that make stopping safe for varying speeds and road conditions.

Shuangye Electric Bike has a 250-watt motor that is powered by a Lithium Polymer battery. A charge of 4-6 hours will allow you to travel a considerable distance, depending on terrain and weather conditions. The bike sports a sturdy rack behind the saddle seat so you may secure any items you need to carry along.

Operating the bike is easily accomplished for nearly any age, from young people to the more mature individual. It is an excellent alternative for commuting and/or shopping and errands. The electric bike doesn't add to air or noise pollution. The battery can be recharged for several hundred hours before it needs to be replaced.
