An electric fat bike with a 250/350/500 watt in the rear wheel, provides excellent stability on soft terrain?20/26 inch frame for your choice

Powerful 36/48 volt Lithium-ion battery pack built with high quality, it's removable for charging on or off the bicycle frame but relies on a dongle adapter to accomplish this (which could get lost more easily than if they used the same port type)

Offers shimano 7 gear combinations for easier climbing and low-speed starts, uses a torque sensor to activate the motor so pushing harder delivers more power

12 14 16cm multilayer stainless
